## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 9, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Luscomb.

Luscomb shows a fuel injection device comprising an actuator 90, a displacement amplification chamber 50 as recited, a low pressure fuel passage 54, and a replenishment fuel passage that places the low pressure fuel passage and the displacement amplification chamber in communication and has a check valve 72 which allows a fuel to flow only toward the displacement amplification chamber, wherein the replenishment fuel passage has a throttle portion 71.

### ***Allowable Subject Matter***

3. Claims 4-8, 10-12, and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Peters et al., Omori et al., and Sisson et al. are pertinent to Applicant's invention.
